"The infinite is ageless; but consciousness is fashioning of our mind to become a spiritual being." ~ Antares

"A book of Spiritual Enlightenment..."

Life Before Life: The Journey Of The Soul

by Dr. Marvin A. Lepien & Dr. Rose Lepien

This book is written for the benefit of honest souls throughout the world who have a healthy curiosity or strong feeling about, or perhaps have even experienced having been here in this world before.

"My extended period of experience in dealing with all manners of people from all corners of the earth, has taught me a great deal about human life," said Dr. Marvin A Lepien, Chiropractor and healing specialist. "That is to say, I've gained insight to understand reasoning behind the way people think and act, the way they feel, what they believe, and how they live their lives. Humanism is certainly no stranger to my

understanding. From the very worst type of character, to the very best, I've met them all. I still love people, most of the time.

"Life Before Life" is a product of divine revelations presented to Dr. Rose Lepien's late husband, Dr. Marvin A. Lepien. He was a devoted Chiropractor for forty-eight years, with additional degrees in Metaphysics, Acupuncture, and Internal Medicine. His spiritual curiosity guided him to perform many hypnotic sessions on family members, friends and patients resulting in the unfolding of mysteries of past lives, life before this life, and the journey of the soul. Dr. Rose Lepien completed

his masterpiece through preparing and publishing "Life Before Life."

This book is not a religious work, however it does come close. Involving one of the very great mysteries of life, the actual accessibility by hypnotic regression into former lives and former times, *Life Before Life, The Journey Of The Soul* depicts examples of human existence on both the physical plane and the spiritual plane.
